## NOTICE FOR HOMEOWNER INSTALLATIONS

I, \_\_\_\_\_, the property owner of \_\_\_\_\_,  
Name Property Address  
plan to install the septic system at this property as allowed by the following county code.

*Sec. 66-28. License requirements.*

*(a) On and after the effective date of the ordinance from which this article is derived, no person, except for a private sewage disposal system contractor licensed by the health authority, may construct or alter a private sewage disposal system. Resident owners or intended resident owners who can demonstrate that they are able to perform the installation or alteration in conformance with this chapter may install or alter a system for their own single-family residence, provided such resident owner or intended resident owner pays the applicable unlicensed installer permit fee and complies with two additional mandatory inspections at times as set forth by the health authority.*

I understand that, as the property owner, I am assuming the role and responsibility of the licensed septic system contractor for this installation. The physical installation of the septic system and its components may not be done by anyone other than the actual single family resident property owner/s or a licensed septic installer. I understand that I may NOT hire an unlicensed installer, such as another family member personal friend, etc. to install the septic system. I further understand that Homeowner Installations require two additional compliance inspections, the cost of which adds \$175.00 to the permit fee. The total of 3 compliance inspections shall consist of:

- 1) inspection of tank placement
- 2) inspection of first installed line
- 3) final inspection of all lines/field

Before each of these inspections a 48 Hour Notice must be given to Boone County Health Department for scheduling purposes. There is also an optional homeowner septic system installation education available for \$80.00 / hour.

I understand and concur that I am assuming the role of a licensed septic system contractor for this installation. I must be present during all of the installation construction. I agree to hold myself responsible for compliance with any and all applicable local and state regulations. Failure to abide by this agreement will invoke legal action according to Sec. 66-30 of the Boone County Sewers and Sewage Disposal Code.
